

# Wheel Chair Lifts

## Startracks Power Wheel Chair Lift

This remodeled motor home features a wireless “remotely operated” gull wing entry door. The lift and the door are operated by a hand-held remote that operates both the door and lift.

The door and wall going from the kitchen into the bathroom was structurally modified and made accessible so a wheel chair could go through the wider opening. The same modification was applied to make the bedroom accessible.

The shower was remodeled and was converted to a roll in shower. The toilet area was also modified to make it accessible to a shower commode chair found for sales on [www.startracksmobility.com](http://www.startracksmobility.com). Kitchen cabinets were structurally modified to make room to use a wheel chair.
